EXHIBIT 80

Executive Summary

- Identification and Mitigation Report. In summary, Purdue put in place adequate 26 different risk types are reviewed in the 2013 Annual Financial Risk risk controls and risk mitigation tools in managing these risks.
- Standard risk reporting format is used: (i) Risk Owner, (ii) Elements of Risk, (iii) Existing Risk Management Controls, (iv) Further Actions, and (v) Reporting Procedures.
- Institute of Management Accountants' Statements on Management Accounting-The risk review process is based on a "standard" process recommended by the Enterprise Risk Management: Frameworks, Elements, and Integration.
- The reporting format is based on a risk reporting template recommended by the Corporate Executive Board organization.
- Page 7 has the Table of Contents.

Note: This report only selects a limited number of risk types for review. This is not a comprehensive review of enterprise risks. A comprehensive Enterprise Risk Management review was completed with Purdue Executive Committee in Q2-2011, which is planned to be refreshed in 2014.

Short-Term Investments

Risk Owner

Treasurer

· Credit Elements of Risk Interest rate

Custody

Regulatory (e.g. new money market fund rules from SEC)

All short-term investments are in US Government/Agency securities or Money Market Funds that hold only these types of securities. Management **Existing Risk** Controls

All short-term investments have maturities less than 6 months.

Short-term investment securities and shares in money market funds are held in accounts in the name of the specific Purdue entity. Unlike a bank depository account, these assets are not commingled with the banks' assets.

 The custodian banks who hold the government securities and money market funds are considered stable and are rated by S&P at [A-] or above. To optimize interest income under current market condition, target allocation is 75% T-bills and 25% money market funds. Allocation is fine-tuned depending on market conditions.

Further Actions

none

 Short-term investments report is issued daily to Treasurer. Procedures Reporting

 Weekly cash forecast is performed to optimize interest income per the short-term investment policy.

Risk review is performed annually.

9/30/2013

- At year-end 2007 short-term investments consisted of high quality commercial paper and CDs.
- As the credit crisis grew in early 2008, investments were shifted to Treasuries and GSEs to reduce =
- In 2009, spreads between Treasuries and Agencies narrowed. As a result, investment allocation shifted towards Treasuries. This continues to be the trend
- During the latter part of 2011, treasury bill and agency yields were zero to negative while money market funds with the same securities were yielding 0.01%.
- As Europe's debt crisis subsided in mid-2012, U.S. Treasury yields had improved slightly
- Starting in 2013-Q3, amid Fed's talk of tapering their quantitative easing program, the long-term yields have spiked up nearly 1%. However, short-term yields have not risen with the same magnitude.

UNREDACTED - CONTAINS OUTSIDE PROFESSIONALS' EYES ONLY INFORMATION.

TREAT SUBJECT TO PROTECTIVE ORDER

Short-Term Investments

Proposed SEC rule details: contains two potential operational rules - can be implemented separately or

Floating rate NAV

Daily share prices would fluctuate to the nearest basis point (0.01%)

Fluctuation would be based on the performance of the underlying holdings, just like any other fund

Withdrawal restriction options when a fund crosses a liquidity threshold (15% weekly liquidity)

Impose redemption "gates" (not permit withdrawals) for up to 30 days

Allow fund to charge up to 2% (as set by the fund's board) on all withdrawals

Require notification and disclosure of liquidity trigger and actions

Government funds exempted in proposed rule, but can opt-in

Other rules - report fund holdings, strengthen diversification, enhance stress testing

Next Steps

The rule is not yet effective (i.e. not approved nor implemented.)

90-day comment period (ending in September 2013)

Rule revision by SEC

SEC vote; if approved, final regulations released with an effective date TBD

Defined Benefits Pension Investments

2.1.3 + Financial + Interna

Risk Owner

Elements of

Risk

Pension Investment Committee

Funding target: meet liability projection

Performance of investments

Fiduciary responsibilities

Regulatory (e.g. ERISA and DOL) compliance

With contribution and return, Purdue targets to reach ≥95% ERISA funding target.

Assume a realistic long-term investment return expectation @ 7% p.a.

Routine performance monitoring and benchmarking of investments.

Utilize indexing for asset classes where active management yields little value.

Schedule of review meetings with SEI - investment manager, along with actuary. SEI as Purdue's co-fiduciary – asset liability study and asset allocation modeling.

Hired an 3rd-party consultant to critique Purdue's pension management process.

Provide annual training for the Pension Investment Committee

Further Actions

Consider utilizing 3rd-party consultant in a review process once every 3-5 years

Quarterly pension plan performance report

SEI presentation to pension investment committee

Procedures Reporting

Routine pension investment committee meeting minutes

Pension actuary reports

Financing / Credit Availability

Risk Owner

Chief Financial Officer / Treasurer

Elements of

Risk

- Secure credit capacity for varying needs of working capital
- Secure credit capacity for letters of credit, e.g. insurance, clinical trials, etc.
- Prepare credit availability, monitor cost of borrowing, and maintain relationship with lenders; when appropriate, provide financing options to the Board in the event cash is needed for icensing or acquisition opportunities.
- **Existing Risk**

Management

Controls

- Forecast working capital needs long-term, medium-term, and short-term cash flows forecasts.
 - Benchmark working capital performance
- In Oct 2012, extended Purdue's \$45mm line of credit (cash-collateralized in Treasuries) with Bank of America for 3 years, while locked in investment-grade pricing. Next renewal time is October 2015.
- Ongoing monitoring of credit markets, e.g. Loan Pricing Conference, Reuters' Gold Sheet, AFP website, and industry surveys.
- Annual business update meetings with two relationship banks: Bank of America and JP Morgan Chase.

Further Actions

None

- Publish long-term, medium-term, and short-term cash flows forecasts.
- Provide credit markets snapshot, once-a-year or as needed basis.

Procedures

Reporting

- Ongoing monitor of utilization levels of line of credit.
- Prepare business update presentation and provide meeting minutes on business update meetings with banks.

Notes

U.S. Pharma is defined as:

1) Industry Classifications: Biotechnology (Primary) OR Pharmaceuticals (Primary)

2) Total Revenue [Latest 12-Month] (\$USDmm, Historical rate): is greater than \$500mm.

3) EBITDA [Latest 12-Month] (\$USDmm, Historical rate): is greater than \$0mm. (i.e. profitable)

4) Geographic Locations: United States of America (Primary)
 Total 33 companies selected by Capital 10 in 2013 report.

9/30/2013

Risk Management, Annual Review

For Purdue, DPO is published by Finance from internal reporting. DIO is calculated by standard formula. Purdue DSO is from internal financial reporting. Excluded rebates.

(a) Industry's DPO average is not comparable to Purdue because Purdue's cost of goods is

de minimis comparing with others. Purdue number excluded rebates DPO.

(b) Purdue maintains cash at 3 months of net sales for working capital uses. Other companies might have short-term bank credit facilities for working capital uses; thus, they can

maintain lower cash balances. (c) Purdue's DIO on finished goods was 112 days.

Fraudulent ACH debits

Forged checks

Management **Existing Risk**

Positive pay ensures checks only clear for amount, check number and vendor of a check issued by Purdue; no check cashing capability at bank branches.

Daily review of all wires hitting all our bank accounts (performed by Treasury)

Monthly bank account reconciliation by Accounting

Secured electronic payment approval process in SAP via biometric security with fingerprint authentication

Separate approvers required for all third-party wire transfers in Treasury Workstation (total 2 people are required)

Newly implemented PaySource process with integrated payable and payment processes, with enhanced controls to ensure proper payment approval and secure transmission of payment information to bank.

Triennial review of list of authorized signers recorded at bank (performed by Treasury)

\$15mm Crime insurance (worldwide)

Segregation of duties between invoice processing, vendor master maintenance and payment processing.

Monthly reviews of changes to vendor master, annual cleansing of vendor master, annual fraud audit and software to detect duplicate payments.

ACH debit blocks to be implemented on all DDA bank accounts.

ACH debit blocks have been implemented on 33 DDA bank accounts. **Further Actions**

There are 23 DDA bank accounts left that need ACH debit blocks. Evaluation continues.

Economic Pertormance

Risk Owner

Chief Financial Officer

Elements of Risk

General economic performance (whether favorable or unfavorable) affects pharmaceutical industry. (source: IMS) Economic performance impacts Purdue's operations such as distributors, business partners, customers, suppliers, credit providers, pension funding, etc.

> Management **Existing Risk** Controls

Using financial instruments to mitigate risk of economic performance is very costly.

However, the correlation has ended at the end of 2012 when consumer confidence remains high cyclical industries while the magnitude of impacts, if any, are generally less severe. However, the recent economic recession is changing this generally assumption—in the last 24 months, Pharmaceutical sales are generally believed less dependent on economic cycles than other there was a strong correlation between pharmaceutical sales and consumer confidence. but medical utilization continues at depressed levels.

Significant economic news, economic indicators, and public-domain economic projections are shared with key finance executives so financial assumptions can be fine-tuned if necessary.

Closely monitor/manage working capital (accounts receivable and accounts payable)

Quarterly reports of key economic and financial indicators are published. Data come from Federal Reserve, Capital IQ, and other sources.

Further Actions

None

Procedures Reporting

Significant economic news, economic indicators, and public-domain economic projections are shared with key finance executives, as needed basis.

Quarterly reports of key economic and financial indicators are published to the CFO.

Economic Performance 2.2.1 * Financial * Market (cont.)

UNREDACTED - CONTAINS OUTSIDE PROFESSIONALS' EYES ONLY INFORMATION.

TREAT SUBJECT TO PROTECTIVE ORDER

Risk Owner

Chief Financial Officer

Kisk Owner Elements of Risk

- Inflation affects Purdue's cost of doing business, e.g. labor costs, cost of raw materials, interest rate movement, etc.
- Cost of purchases in business contracts is often tied to an inflation index such as CPI or PPI.
- Actual inflation contributes to budget variance, if actual inflation materially varies from budget assumption.

Existing Risk Management

Controls

- Significant inflation news and public-domain inflation projections are shared with key finance executives so financial assumptions can be fine-tuned if necessary. Using financial instruments to mitigate risk of inflation is very costly.
- Maximize use of fixed cost rate in business contracts.
- Monitor third-party outlook of U.S. inflation. (A recent copy is attached as a reference.)
- Use third-party analytical forecasts to support budgetary assumptions.

Further Actions

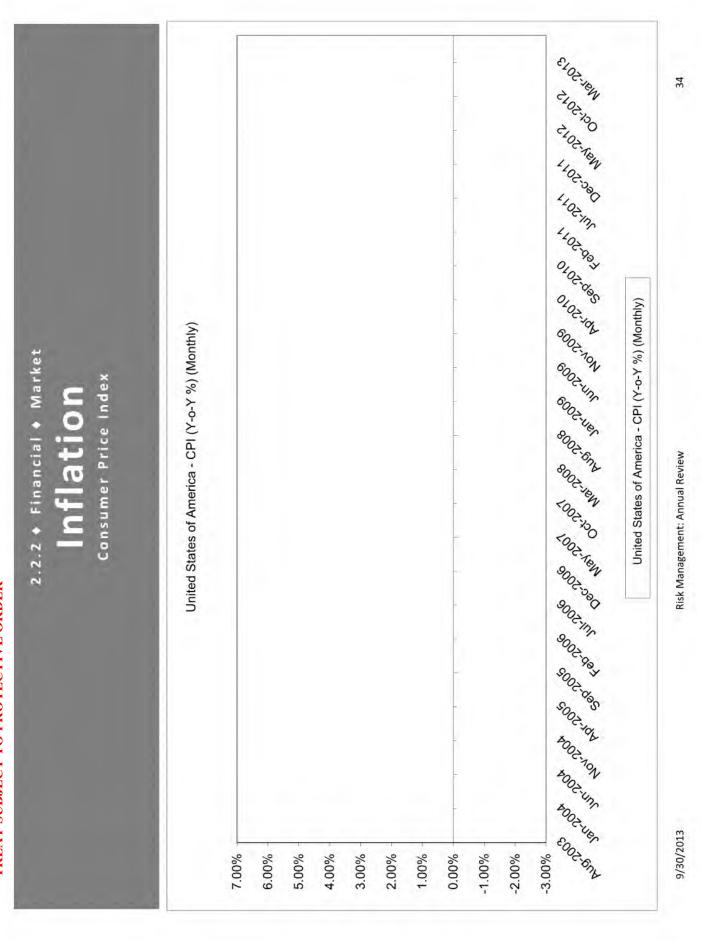

None

Reporting Procedures

 Significant inflation news and public-domain inflation projections are shared with key finance executives, as needed basis.

The Affordable Care Act

Risk Owner

Elements of

Risk

Purdue Corporate

- Health Insurance Exchanges run by the individual states starting in 2014. Pharmacy standards/metrics and incentives in Government programs as well as provisions for Health Care Reform requires increased rebates and other fees on pharmaceutical industry starting in 2010. Health Care Reform also includes Quality of Care Benefit Managers will play a major role in these areas.
- Management **Existing Risk** Controls
- strategies to meet challenges of Health Care Reform. RPC reports to Commercial Managed Care organization and Rebate Pricing Committee (RPC) to develop Products Portfolio Committee.
- Working with Purdue's Law Department, continue ongoing review of rules, interpretation, and development of the Health Care Reform Act.
- Working with Purdue's Rebate/Reimbursement Group to include the financial impact into the budget financials.
- Monitor reports and analyses from equity analysts, market researchers, and Congressional Budget Offices for latest forecasts.

None **Further Actions**

- **Procedures** Reporting
- Financial impact is part of the budgeting and financial reporting process.

Z.Z.3 • Financial • Market The Affordable Care Act

(Cont.)

Health Care Reform enacted in early 2010 increased rebates and other fees on the pharmaceutical industry. Medicare Part D:

Effective January 1, 2011, manufacturers are required to pay 50% of the cost of a patient's prescription while in the donut hole.

\$2,930 - \$6,658 \$6,658*

Covered by patient and Medicare Part D program Covered by patient and manufacturer (50/50)

Covered primarily by Medicare Part D program

Medicaid:

Change in base rebate rate percentage to 23.1% minimum for brand products States' Medicaid population shifting requiring increased rebates for formulary inclusion

Managed Medicaid population covered by PBM is now entitled to higher Medicaid rate

down by US Supreme Court.. States will have to determine how to handle patients through Health Insurance Exchanges. Subsidies Medicaid expansion to extend coverage to those with incomes above 133% of federal poverty (beginning January 2014) struck

likely required.

Annual Fee on Branded Prescription Pharmaceutical Sales:

Based on manufacturer's relative share of the aggregated branded drug sales across government programs (effective 2011 based on 2010 sales/market)

Impact of Health Care Reform:

(5-Year History)

Corporate Procurement

- Energy prices are subject to influences of many factors such as supply, demand, Elements of Risk
- Purdue's 2013 budget projected a spend of \$13.6 million in various energy uses such as geopolitical event, economic policy, value of the U.S. dollars, etc. electricity, natural gas and gasoline.
- Material fluctuations in energy prices and supply could significantly impact manufacturing costs, supply chain, product supply to customers and financial results.
- Management **Existing Risk** Controls
- Long-term projection of energy prices is built into the 2013 budget assumption, i.e.

Corporate Procurement placed long-term contracts: 50% of the 2013 budget are fixed-

- average gasoline price in 2013. (another 31%)
- 52% of the 2013 budget is electricity and 19% of it is variable-priced. Electricity rates are subject to regulatory review and a mix of different generation methods such as coal, gas, nuclear, hydro, etc. Material change within a 12-month window is unlikely.
- Thus, true exposure is only at 9% (or \$1.3MM) of the 2013 energy budget.
- Purdue's property policy that covers property damage or business interruption as a result of a service interruption has a \$100/50mm service interruption sublimit for U.S./ex-USA.
- **Further Actions**

Back up sourcing for API

Purdue's property insurance has \$1 billion limits (subject to sub-limits on flood, quake, etc). Its coverage would allow Purdue to roughly cover between three and four months of sales.

Further Actions

Consider qualifying a backup for Morphine Sulfate API for Rhodes Pharma (Note: A second source strategy is in place for morphine for Rhodes Pharma. Plan is to qualify Rhodes Technologies API, scheduled to be available in 2014.) New back up facility to replace Totowa (announced at Treyburn Corporate Park in Durham County, North Carolina, in September 2013)

- contributions and their commitment to property loss prevention. This award is given to less than 1% Wilson received the 2010 Award of Excellence from FM Global. Totowa received the same award in 2011. Cranbury to receive this award in 2013. These facilities were recognized for their significant of the sites FM Global inspects.
- Coventry receive HPR status in late 2011.
- Wilson converted to duel fuel boilers and installation of two 30,000 diesel tanks for the boilers and generators. This will allow Wilson to run up to eight days without electricity and gas.
- Rhodes Generators will only run controlled shutdown of critical processes and life safety systems.
- Totowa No generators.
- Property Insurance has \$1 billion limits (subject to sub-limits on flood, quake, etc). Based on the cost monthly sales margin of \$250mm, our coverage would allow us to cover between 3 to 4 months of to replace the fixed assets and inventory at Wilson of approximately \$170mm and an average sales. Within the time period to ramp up Totowa.
- continuity plan for Cambridge. All parties participated agreed to participate at a follow up meeting in property loss prevention at major manufacturing and research facilities. The meeting was found to In late 2012, Purdue and Mundipharma met with F.M. Global in exploring further opportunities in be productive. The major takeaway was for Mundipharma/Napp to provide FM Global with a late 2013.

Risk Identification and Mitigation Selected Risks

December 1, 2014

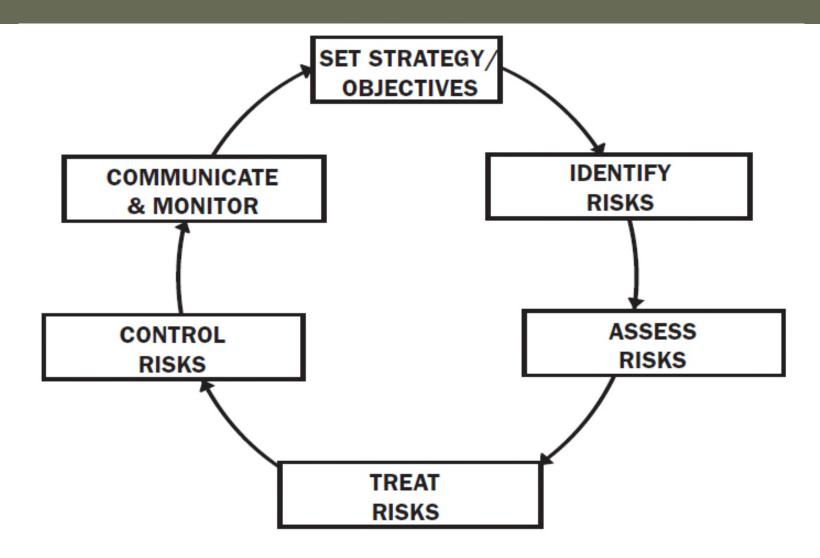

<u>Conf</u>idential

Risks addressed separately from this report include: Human Resources, Litigation, Compliance, Facility, Security, Research and Development, Intellectual Property, EHS, and Environment.

- 26 different risk types are reviewed in the 2014 Annual Financial Risk Identification and Mitigation Report. In summary, Purdue put in place adequate risk controls and risk mitigation tools in managing these risks.
- Standard risk reporting format is used: (i) Risk Owner, (ii) Elements of Risk, (iii) Existing Risk Management Controls, (iv) Further Actions, and (v) Reporting Procedures.
- The risk review process is based on a "standard" process recommended by the Institute of Management Accountants' Statements on Management Accounting--Enterprise Risk Management: Frameworks, Elements, and Integration.
- The reporting format is based on a risk reporting template recommended by the Corporate Executive Board organization.
- Page 7 has the Table of Contents.

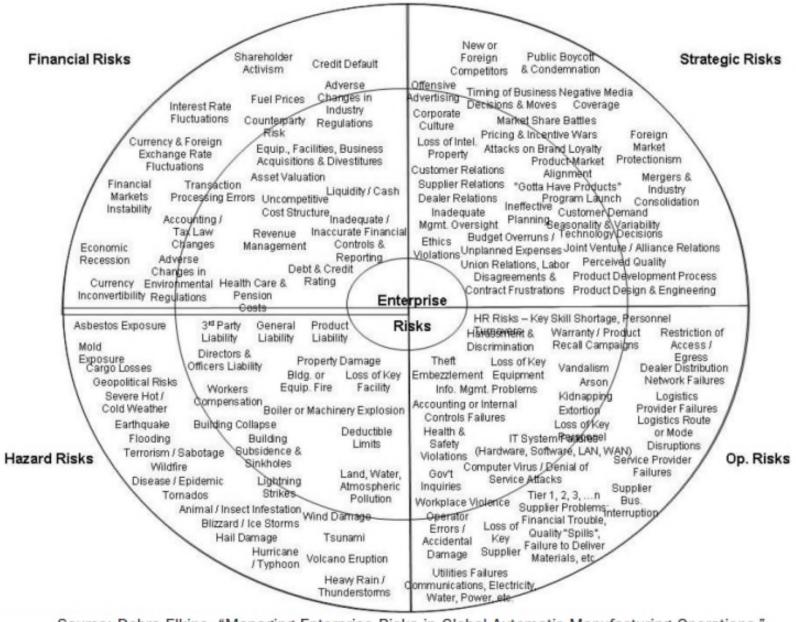

Note: This report only selects a limited number of risk types for review. This is not a comprehensive review of enterprise risks. A comprehensive Enterprise Risk Management review was completed with Purdue Executive Committee in Q2-2011, which is planned to be refreshed in 2014.

UNREDACTED - 19:23649 No Dougle 2250 Rope Filed 01/11/21 Frantered 01/11/21 23:32:12 Exhibits TREAT SUBJECT TO PROTECTIVE ORDER POST 2 at Eg 71 of 122 orthors Licensing/Business Development Partners

Risk Owner	Licensing and Business Development
Elements of Risk	 Partner's capabilities and abilities to execute its business plan and contractual commitments. Partner's financial creditworthiness staying as an ongoing business entity. Partner's legal/financial obligations and liability with other third parties.
Existing Risk Management Controls	 Operational and capability due diligence on partner. Financial due diligence on partner. Legal review and due diligence on key contracts with third parties. Review S&P rating and D&B reports, if available. In key alliances, Purdue representative attends partner's Board meeting. In key partnerships, Purdue participates at key steering committees with partner. In partnerships with significant investments by Purdue, Purdue has final decision-making power in steering committees.
Further Actions	None
Reporting Procedures	 Due diligence report prior to formation of partnership. Ongoing Board meeting reports, committee meeting minutes, and financial reports. Business update reports were issued on partners in which Purdue has significant equity investments, e.g. Infinity, Optherion, etc.

Competitive Pressure

Risk Owner	Purdue Corporate
Elements of Risk	 Key competitive entrants to the marketplace can significantly impact the value of Purdue's marketed products and pipeline development projects.
Existing Risk Management Controls	 Marketing (and Credit) issues daily newsflash recapping developments in pain management, pain research, Purdue competitors, and related therapeutic areas such as opioid induced constipation (OIC), insomnia, depression, and FDA regulations, etc. As part of the 10-year planning process, the pipeline projects are recertified annually to ensure their attractiveness from return on investments. The recertification process includes Marketing's review of competitive landscape and the payors' environment. Purdue staff regularly attend industry pain conferences such as American Pain Society. Licensing and Business Development staff regularly attend partnership conferences in which new technology and product development are presented. Corporate objectives: portfolio diversification, patents portfolio, focus on key competencies, in-licensing opportunities, and M&A opportunities.
Further Actions	None
Reporting Procedures	 Routine newsflash from Marketing and Credit. Headline alerts from Credit. Purdue's 10-Year Plan and Recertification Report (published annually). Trip reports from Purdue staff from key conferences and business development meetings.
12/1/2014	Diek Management, Annual Paviau

Pandemic

Risk Owner	Environment, Health and Safety (EHS)
Elements of Risk	 Ebola Virus Disease Avian Influenza A (H7N9) Virus Middle East Respiratory Corona Virus (MERS-CoV) Seasonal Influenza
Existing Risk Management Controls	 In response to the number and variety of emerging health issues of concern, the Pandemic Planning Committee has been re-configured to become the Purdue Outbreak Response Team (PORT). Team members representing Medical, Risk Management, Human Resources, EHS, Security and Finance are included. The group meets as required when specific threats are triggered. The Business Continuity and Pandemic Planning Team intranet page is being updated to reflect the new, broader mandate of the group, and is now entitled the Business Continuity and Purdue Outbreak Response Team site. The contents of the pages are being updated to reflect current business status. Employee communications is an important aspect of risk management. To that end, the Purdue Health Alert Information site is available to all employees on the EHS intranet site as a source of information and helpful links to agencies and organizations involved with the management and control of emerging health issues. Employees have capabilities to work at a remote location (Totowa site) and in virtual offices (home or contracted location) for specific Business Continuity needs.
Further Actions	Updating of BCP documents continuing with business realignment.
Reporting Procedures	None

Risk Owner	Treasurer
Elements of Risk	Bank creditworthinessPreservation of principal
Existing Risk Management Controls	 Limit balances in bank accounts in US banks to \$250,000 (current limit of FDIC insurance) Hold cash balances in depository banks with S&P ratings of A- or above Monitor credit ratings of major domestic banks Monitor CDS of depository banks Invest excess cash in short-term U.S. Treasury bills or Agencies or Tier 1 non-financial Commercial Paper or mutual funds which invest in short-term U.S. Treasury bills and Agencies are backed by the U.S. government)
Further Actions	 Monitor levels of Federal Deposit Insurance Corporation (FDIC) insurance coverage for US bank accounts
Reporting Procedures	 Risk review is performed annually Bank credit rating report is published annually, or on as needed basis

Cash in Bank Accounts

(Cont.)

- All 57 bank accounts are with JP Morgan Chase.
- JP Morgan Chase has a S&P rating of A.
- Out of the top US banks, JP Morgan Chase has the 3rd lowest CDS rates. Lower rates generally indicate lower default risks.
- As of 6/30/14, total cash balances of \$10.3 million are in these bank accounts.
 - These cash generated earning credits which offset cash management fees.
 - Cash deposited at DDA accounts is covered by \$250,000 FDIC protection.

Risk Owner	Treasurer
Elements of Risk	 Credit Interest rate Custody Regulatory (e.g. new money market fund rules from SEC)
Existing Risk Management Controls	 All short-term investments are in US Government/Agency securities or non-financial Tier 1 Commercial Paper or Money Market Funds that hold only US Government/Agency securities. All short-term investments have maturities less than 6 months. Short-term investment securities and shares in money market funds are held in accounts in the name of the specific Purdue entity. Unlike a bank depository account, these assets are not commingled with the banks' assets. The custodian banks who hold the securities and money market funds are considered stable and are rated by S&P at [A-] or above. To optimize interest income under current market condition, target allocation is 75% T-bills and 25% money market funds. Allocation is fine-tuned depending on market conditions.
Further Actions	none
Reporting Procedures	 Short-term investments report is issued daily to Treasurer. Weekly cash forecast is performed to optimize interest income per the short-term investment policy. Risk review is performed annually.

- At year-end 2007 short-term investments consisted of high quality commercial paper and CDs.
- As the credit crisis grew in early 2008, investments were shifted to Treasuries and GSEs to reduce risk.
- In 2009, spreads between Treasuries and Agencies narrowed. As a result, investment allocation shifted towards Treasuries. This continues to be the trend until mid 2014.
- Currently, spreads between Treasuries and Agencies has widened, investment allocation has shifted towards Agencies. Also reallocated more funds to Tier 1 Non-Financial Commercial Paper.

New SEC Money Market Fund Reforms: implementation date of October 14, 2016

- **New Definitions**
 - Government Fund Is a fund that invests 99.5% of their total assets in cash, government securities or repurchase agreements collateralized by government securities. These funds are to be exempt from these new rules.
 - Retail Funds Are Prime and Tax-Exempt funds designed to limit beneficial owners to natural persons, meaning individual investors, or human beings. These funds may look through to the end investor to determine whether beneficial ownership is limited to natural persons.
- Floating rate NAV apply only to Institutional Prime or Tax-Exempt funds
 - Daily share prices would fluctuate to the nearest basis point (0.01%)
 - Fluctuation would be based on the performance of the underlying holdings, just like any other fund
- Redemption Gates and Liquidity Fees when a fund crosses a liquidity threshold (10%/30% weekly liquidity or 1%/2% liquidity fees) – Prime and Tax-Exempt funds only
 - Impose redemption "gates" (not permit withdrawals) for up to 10 days on withdrawals below fund's weekly liquidity thresholds
 - Allow funds to charge up to 2% (as set by the fund's board) on withdrawals below fund's weekly liquidity thresholds
 - Require notification and disclosure of liquidity trigger and actions
 - Government funds can opt-in

- The plans are managed by SEI which acts as a manager of individual fund managers. The target asset allocation for the PPLP plan is Equity 56%; Fixed Income 44%. The target asset allocation for the PFL plan is Equity – 0%; Fixed Income – 100%.
- In September 2011, per asset-allocation study and performance review of the SEI Hedge Fund, Purdue Investment Committee implemented the recommendation of exiting the SEI Hedge Fund and investing its assets in existing equities and fixed income funds.
- About 50% of the PPLP plan assets are indexed.
- In late 2011, Purdue Investment Committee implemented the recommendation to employ liability-driven investing (LDI) for the PFL plan, which will help to minimize volatility of its ERISA funding ratio.
- In 2013 June year-to-date, Purdue had contributed \$5.8 million to the pension plans. 2013 full-year budget of cash funding is \$10.7 million.
- Under the ERISA (employee retirement income security act), the pension plans are funded approximately in the 95% range (APTAP).
- 2013 June month-end, PPLP portfolio's 1-year return was 11.5%. In beginning of 2013, Plans assumed a 7% return for full-year 2013.

Risk Owner	Chief Financial Officer / Treasurer
Elements of Risk	 Secure credit capacity for varying needs of working capital Secure credit capacity for letters of credit, e.g. insurance, clinical trials, etc. Prepare credit availability, monitor cost of borrowing, and maintain relationship with lenders; when appropriate, provide financing options to the Board in the event cash is needed for licensing or acquisition opportunities.
Existing Risk Management Controls	 Forecast working capital needs – long-term, medium-term, and short-term cash flows forecasts. Benchmark working capital performance In Oct 2012, extended Purdue's \$45mm line of credit (cash-collateralized in Treasuries) with Bank of America for 3 years, while locked in investment-grade pricing. Next renewal time is October 2015. Ongoing monitoring of credit markets, e.g. Loan Pricing Conference, Reuters' Gold Sheet, AFP website, and industry surveys. Annual business update meetings with two relationship banks: Bank of America and JP Morgan Chase.
Further Actions	• None
Reporting Procedures	 Publish long-term, medium-term, and short-term cash flows forecasts. Provide credit markets snapshot, once-a-year or as needed basis. Ongoing monitor of utilization levels of line of credit. Prepare business update presentation and provide meeting minutes on business update meetings with banks.

Notes

U.S. Pharma is defined as:

- 1) Industry Classifications: Biotechnology (Primary) OR Pharmaceuticals (Primary)
- 2) Total Revenue [Latest 12-Month] (\$USDmm, Historical rate): is greater than \$500mm.
- 3) EBITDA [Latest 12-Month] (\$USDmm, Historical rate): is greater than \$0mm. (i.e. profitable)
- 4) Geographic Locations: United States of America (Primary)

Total 33 companies selected by Capital IQ in 2013 report.

For Purdue, DPO is published by Finance from internal reporting. DIO is calculated by standard formula. Purdue DSO is from internal financial reporting. Excluded rebates.

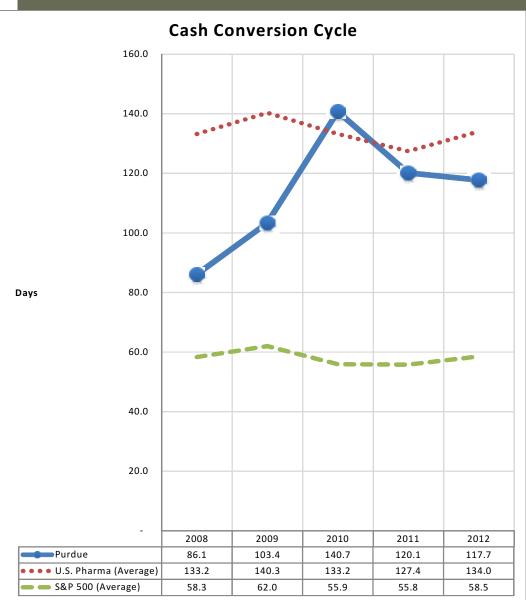

- (a) Industry's DPO average is not comparable to Purdue because Purdue's cost of goods is de minimis comparing with others. Purdue number excluded rebates DPO.
- (b) Purdue maintains cash at 3 months of net sales for working capital uses. Other companies might have short-term bank credit facilities for working capital uses; thus, they can maintain lower cash balances.
- (c) Purdue's DIO on finished goods was 112 days.

Economic Performance

Risk Owner	Chief Financial Officer
Elements of Risk	 General economic performance (whether favorable or unfavorable) affects pharmaceutical industry. (source: IMS) Economic performance impacts Purdue's operations such as distributors, business partners, customers, suppliers, credit providers, pension funding, etc.
Existing Risk Management Controls	 Using financial instruments to mitigate risk of economic performance is very costly. Pharmaceutical sales are generally believed less dependent on economic cycles than other cyclical industries while the magnitude of impacts, if any, are generally less severe. However, the recent economic recession is changing this generally assumption—in the last 24 months, there was a strong correlation between pharmaceutical sales and consumer confidence. However, the correlation has ended at the end of 2012 when consumer confidence remains high but medical utilization continues at depressed levels. Significant economic news, economic indicators, and public-domain economic projections are shared with key finance executives so financial assumptions can be fine-tuned if necessary. Closely monitor/manage working capital (accounts receivable and accounts payable) Quarterly reports of key economic and financial indicators are published. Data come from Federal Reserve, Capital IQ, and other sources.
Further Actions	• None
Reporting Procedures	 Significant economic news, economic indicators, and public-domain economic projections are shared with key finance executives, as needed basis. Quarterly reports of key economic and financial indicators are published to the CFO.

2.2.1 ♦ Financial ♦ Market

Economic Performance

(cont.)

2013-September, J.P. Morgan Med Utilization Tracker Report is attached.

Inflation

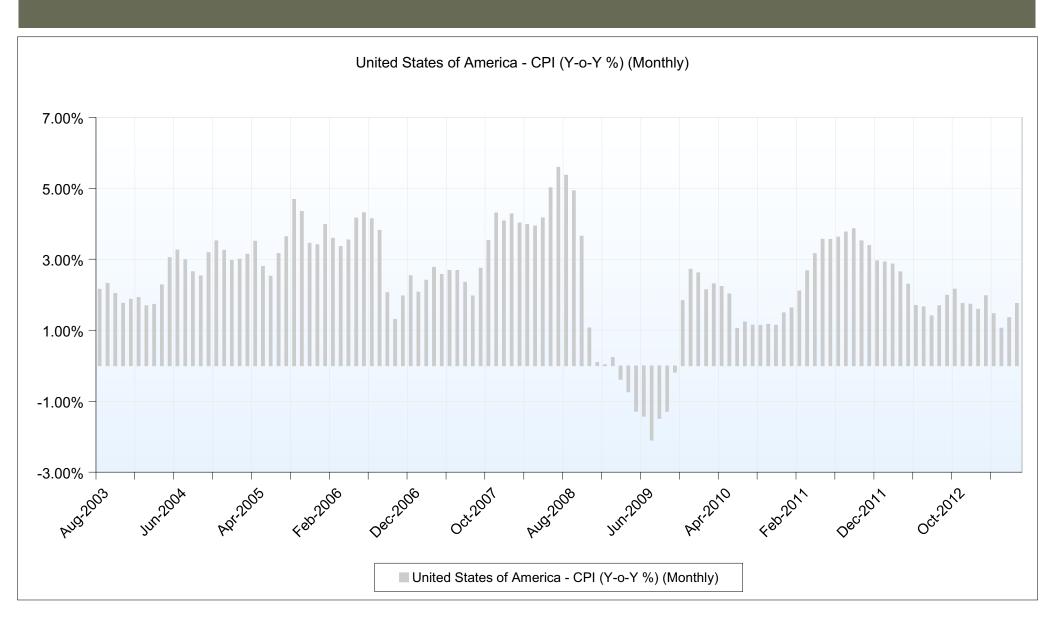

Risk Owner	Chief Financial Officer
Elements of Risk	 Inflation affects Purdue's cost of doing business, e.g. labor costs, cost of raw materials, interest rate movement, etc. Cost of purchases in business contracts is often tied to an inflation index such as CPI or PPI. Actual inflation contributes to budget variance, if actual inflation materially varies from budget assumption.
Existing Risk Management Controls	 Using financial instruments to mitigate risk of inflation is very costly. Significant inflation news and public-domain inflation projections are shared with key finance executives so financial assumptions can be fine-tuned if necessary. Maximize use of fixed cost rate in business contracts. Monitor third-party outlook of U.S. inflation. (A recent copy is attached as a reference.) Use third-party analytical forecasts to support budgetary assumptions.
Further Actions	None
Reporting Procedures	 Significant inflation news and public-domain inflation projections are shared with key finance executives, as needed basis.

TREAT SUBJECT TO PROTECTIVE ORDER

Inflation

Consumer Price Index

Risk Owner	Purdue Corporate
Elements of Risk	 Health Care Reform requires increased rebates and other fees on pharmaceutical industry starting in 2010. Health Care Reform also includes Quality of Care standards/metrics and incentives in Government programs as well as provisions for Health Insurance Exchanges run by the individual states starting in 2014. Pharmacy Benefit Managers will play a major role in these areas.
Existing Risk Management Controls	 Managed Care organization and Rebate Pricing Committee (RPC) to develop strategies to meet challenges of Health Care Reform. RPC reports to Commercial Products Portfolio Committee. Working with Purdue's Law Department, continue ongoing review of rules, interpretation, and development of the Health Care Reform Act. Working with Purdue's Rebate/Reimbursement Group to include the financial impact into the budget financials. Monitor reports and analyses from equity analysts, market researchers, and Congressional Budget Offices for latest forecasts.
Further Actions	None
Reporting Procedures	Financial impact is part of the budgeting and financial reporting process.

The Affordable Care Act

(Cont.)

■ Health Care Reform enacted in early 2010 increased rebates and other fees on the pharmaceutical industry.

Medicare Part D:

- Effective January 1, 2011, manufacturers are required to pay 50% of the cost of a patient's prescription while in the donut hole.
 - Covered by patient and Medicare Part D program
 - \$2,930 \$6,658 Covered by patient and manufacturer (50/50)
 - \$6,658+ Covered primarily by Medicare Part D program

Medicaid:

- Change in base rebate rate percentage to 23.1% minimum for brand products
- States' Medicaid population shifting requiring increased rebates for formulary inclusion
 - Managed Medicaid population covered by PBM is now entitled to higher Medicaid rate
- Medicaid expansion to extend coverage to those with incomes above 133% of federal poverty (beginning January 2014) struck down by US Supreme Court. States will have to determine how to handle patients through Health Insurance Exchanges. Subsidies likely required.

Annual Fee on Branded Prescription Pharmaceutical Sales:

Based on manufacturer's relative share of the aggregated branded drug sales across government programs (effective 2011 based on 2010 sales/market)

Impact of Health Care Reform:

Foreign Exchange

Risk Owner	Chief Financial Officer / Treasurer							
Elements of Risk	 Purdue's foreign exchange exposure includes inflows of royalty income and outflows for German/Europe/Japan funding, Redacted R&D funding, and vendor payment. In 2013 Budget, Purdue has an inflow of \$41 million in 11 foreign currencies and an outflow of \$173 million in 7 foreign currencies. This results in a net outflow of \$132 million from 12 foreign currencies. Purdue's foreign exchange risk is dominated by the net outflow of €118 million in Euros. Appreciation or depreciation of U.S. dollars against foreign currencies can have material impacts onto Purdue's cash flows and financial results versus budget. 							
Existing Risk Management Controls	 Purdue's foreign exchange exposure is analyzed at least once a year. Projection of foreign exchange is provided by Bank of America. Multiple scenarios of foreign exchange movement are reviewed. Foreign exchange exposure is shared with the Board and advisors and is managed at a higher level. 							
Further Actions	• None							
Reporting Procedures	 Purdue's foreign exchange exposure analysis is done at least once a year. The FX exposure analysis was completed in January 2013.

Energy

Risk Owner	Corporate Procurement
Elements of Risk	 Energy prices are subject to influences of many factors such as supply, demand, geopolitical event, economic policy, value of the U.S. dollars, etc. Purdue's 2014 budget projected a spend of \$11.6 million in various energy uses such as electricity, natural gas and gasoline. Material fluctuations in energy prices and supply could significantly impact manufacturing costs, supply chain, product supply to customers and financial results.
Existing Risk Management Controls	 Corporate Procurement placed long-term contracts: 64% of the 2014 budget are fixed-priced. Long-term projection of energy prices is built into the 2014 budget assumption, i.e. average gasoline price in 2014. 59% of the 2014 budget is electricity and 17% of it is variable-priced. Electricity rates are subject to regulatory review and a mix of different generation methods such as coal, gas, nuclear, hydro, etc. Material change within a 12-month window is unlikely. Thus, true exposure is only at 10% (or \$1.1MM) of the 2014 energy budget. Purdue's property policy that covers property damage or business interruption as a result of a service interruption has a \$100/50mm service interruption sublimit for U.S./ex-USA.
Further Actions	• None

Energy Forecast by Bank of America, 11/23/2014

OPEC keeps oil prices low

Our commodity strategists expect WTI and Brent prices to rebound to an average of \$85/bbl and \$93/bbl in 4Q, respectively, and \$90/bbl and \$98/bbl in 2015. They see the recent swoon as supply driven with a likely OPEC supply cut on November 27 meeting (Saudinomics for beginners). In addition, the increase in global demand provides support to their 2015 forecasts. They do see risks for a WTI fall to \$75/bbl as Cushing and PADD3 stocks outpace global ones. BofAML's base case sees only a temporary drop in oil before rebounding into year-end and in 2015. However, a high degree of uncertainty around the strength of global demand and OPEC's reaction function in particular mean oil prices could remain at current levels or lower for an extended period. We analyze such a scenario and recommend a trade to benefit from it.

The failure of Saudi Arabia to respond to the recent oil price decline with a production cut has fed speculation of a change in its reaction in response to increasing shale production, and other geopolitical realties (Russia, IS, Iran), according to our EEMEA strategists. A substantial fiscal buffer provides Saudi Arabia room to weather a short-term fall in oil prices below a breakeven of \$95/bbl, allowing it to pursue goals of punishing higher costs suppliers (like Iran, Russia, and newer North American suppliers), while also maintaining/increasing its market share. Indeed, our EEMEA strategists argue a 1mn bpd oil cut would lead to only a \$10/bbl increase in oil prices, incentivizing Saudi to protect oil output market share. This suggests oil could stay low, in which case incremental North American investment could suffer when current wells run dry.

- A.M. Best Company is a global fullservice credit rating agency dedicated to serving the financial and health-care service industries. It began assigning credit ratings in 1906, making it the first of today's rating agencies to use symbols to differentiate the relative creditworthiness of companies.
- Best's Credit Ratings are independent opinions regarding the creditworthiness of an issuer or debt obligation. Best's Credit Ratings are based on a comprehensive quantitative and qualitative evaluation of a company's balance sheet strength, operating performance and business profile, or, where appropriate, the specific nature and details of a debt security.

2.4.2 ♦ Financial ♦ Insurance

Property Insurance

Risk Owner	Treasurer
Elements of Risk	 Property loss or damage Interruption of utilities
Existing Risk Management Controls	 Loss prevention programs Safety programs Back up manufacturing for Wilson Back up sourcing for API Purdue's property insurance has \$1 billion limits (subject to sub-limits on flood, quake, etc). Its coverage would allow Purdue to roughly cover between three and four months of sales.
Further Actions	 Assess whether additional BI limits are needed/available assuming an 18 month gap between Totowa sale/shutdown and Treyburn FDA qualification for ORF.
Reporting Procedures	Annual risk review

2.4.2 ♦ Financial ♦ Insurance

Property Insurance

(Cont.)

Manufacturing Facilities

- Wilson received the 2010 Award of Excellence from FM Global. Totowa received the same award in 2011. Cranbury to receive this award in 2013. These facilities were recognized for their significant contributions and their commitment to property loss prevention. This award is given to less than 1% of the sites FM Global inspects.
- Coventry receive HPR status in late 2011.
- Wilson converted to duel fuel boilers and installation of two 30,000 diesel tanks for the boilers and generators. This will allow Wilson to run up to eight days without electricity and gas.
- Rhodes Generators will only run controlled shutdown of critical processes and life safety systems.
- Totowa No generators.
- Property Insurance has \$1 billion limits (subject to sub-limits on service interruption flood, quake, etc). Based on the cost to replace the fixed assets and inventory at Wilson of approximately \$170mm and an average 2015 monthly sales margin of \$80mm, our coverage would allow us to cover up to 10 months of sales. This could be an area of risk as there could be as much as 18 month gap between sale/shutdown of Totowa and Treyburn FDA qualification for ORF.

2.4.3 ♦ Financial ♦ Insurance

Product Liability Insurance

Risk Owner	Purdue Corporate
Elements of Risk	InjuryDeathDiversionAbuse
Existing Risk Management Controls	 Shipping/Distribution security Sales and Marketing training Product education REMS ORF (new formulation)
Further Actions	 In mid-2012, Purdue worked with two insurance brokers in exploring the insurance market capacity for a product liability policy. The conclusion was that the available product liability insurance is not cost-justified. A check of the product liability insurance markets in mid-2013 and mid-2014 resulted with same conclusion. Continue monitor commercial availability and price of product liability insurance
Reporting Procedures	Annual risk review

3.1.1 ♦ Operational ♦ Value-Chain

Customers – Credit Risk

Risk Owner	Sales Department
Elements of Risk	Creditworthiness of customers
Existing Risk Management Controls	 Annual review of all customers with exposures > \$25k or > \$50k annual sales (i.e. about ≈120 customers are annually reviewed.) News alerts of publically-traded customers are reviewed daily. For privately-held companies we receive at minimum annual reports and for some interim financials. We have good relationships with their senior financial management and talk as needed. Credit lines are based on customer needs and ability to pay. Additional credit requests exceed \$1.0mmthe Controller must approve our exposure, and if it exceeds \$2.0mm the EVP/CFO must approve the exposure.
Further Actions	None
Reporting Procedures	 Significant customer developments are communicated with Sales, Customer Service, and others promptly Annual review performed by Credit Department

Customers - Credit Risk

(Cont.)

- During 2014, Purdue's average accounts receivable balance was \$261 million.
- Our 3 largest customers—AmerisourceBergen, Cardinal Health, and McKesson Corp.—account for approximately 90% of our sales and accounts receivable.
- If one of these Big 3s went under, the supply to our end customers would be uninterrupted since customers would go to their secondary suppliers.
- Based on current credit review, we think that it is unlikely to encounter a credit risk from one of the Big 3 wholesalers in the immediate time horizon.

Risk Owner	Procurement
Elements of Risk	Continuity of mission-critical supplies, materials, and services
Existing Risk Management Controls	 Upon request by business managers, Credit will review new vendors who have potential significant spend as part of the RFP process.
Further Action	None
Reporting Procedure	None

3.1.3 ♦ Operational ♦ Value-Chain

Supply Chain - Continuity

Risk Owner	Corporate Procurement
Elements of Risk	Disruption of critical raw material supplies
Existing Risk Management Controls	 Qualify secondary source Proprietary sources should have back up manufacturing sites Review Business Continuity Plan of suppliers Stock ample levels of raw material without secondary source Due diligence is performed on prospective suppliers/manufacturers of a pending licensing and business development transaction.
Further Actions	 Consider qualifying a backup for Morphine Sulfate API for Rhodes Pharma (Note: A second source strategy is in place for morphine for Rhodes Pharma. Plan is to qualify Rhodes Technologies API, scheduled to be available in 4th quarter 2014.)
Reporting Procedures	Annual reporting

3.1.4 ♦ Operational ♦ Value-Chain

3rd-Party Partner Financial Obligations

Risk Owner	Chief Financial Officer
Elements of Risk	 Non compliance of contractual obligation Failure to receive cash inflows timely Failure to pay cash outflows timely
Existing Risk Management Controls	 Negotiated contract terms developed by a cross-functional team (including Finance) Audit rights included in all contracts Identified individuals responsible for the 3rd-party financial obligations: cash outflows or inflows and reporting Monitoring of business partners including review of public disclosures and financial statements Specific Finance staff members are assigned to manage the financial obligations of key 3rd-party partners. Quarterly royalty (incoming or outgoing) reports are prepared by Finance staff and reviewed/shared with CFO Additional details and explanations are requested for unusual sales variances and significant gross-to-net deductions
Further Actions	None
Reporting Procedures	 Quarterly royalty (incoming or outgoing) reports are prepared by Finance staff and reviewed/shared with CFO
